

SUMMARY

Detail-oriented and driven Computer Science engineer with strong expertise in Python, SQL, and Artificial Intelligence, including machine learning and data analytics. Experienced in developing intelligent systems, AI-driven applications, and automation workflows using modern tools such as Streamlit. Proficient in building scalable, data-centric solutions and applying analytical thinking to solve complex problems. Passionate about leveraging data and AI technologies to enhance decision-making, efficiency, and innovation.

EXPERIENCE

AI Agent Developer

Leapot Technologies | September 2025

- Developed AI-driven learning solutions using intelligent agents for personalized user experiences
- Built and automated AI workflows for decision-making based on user inputs
- Created interactive applications using Python and Streamlit for real-time outputs
- Applied prompt engineering to enhance response quality and user engagement
- Collaborated with cross-functional teams to design and optimize AI features

Intern

Cojag Smart Technology Pvt Ltd | July 2023 – September 2023

- Developed and maintained a Python application integrated with a third-party API, improving data entry efficiency.
 - Conducted unit tests to identify and fix bugs, ensuring application robustness.
 - Worked with a cross-functional team to optimize code and reduce response times.
-

TECHNICAL SKILLS

Languages: Python, SQL

AI & Data Technologies: Machine Learning, Deep Learning, Generative AI, Data Analytics, Power BI, Pandas, NumPy, Scikit-learn, PyTorch, Statistical Analysis

Deployment & Tools: Streamlit, GitHub, REST APIs, API Integration, Render

PROJECTS

AI Study Planner

- Built an AI-based study planner that generates personalized study schedules based on subjects, available time, and deadlines.
- Developed a responsive interactive UI using Streamlit for easy user input and study plan visualization.
- Implemented Python logic for task prioritization and study time allocation.
- Added features for progress tracking and productivity insights to enhance learning efficiency.

Student Productivity Prediction

- Developed a machine learning model to predict student performance using historical data.
 - Performed data preprocessing, feature engineering, and EDA using Pandas and NumPy.
 - Implemented and evaluated ML algorithms to identify key factors affecting outcomes.
 - Built a simple web interface (HTML/CSS) for user input and real-time predictions.
 - Visualized insights using Matplotlib/Seaborn and assessed performance with standard metrics.
-

EDUCATION

B.E. Computer Science and Engineering

Sipna College of Engineering and Technology, Amravati

2020 - 2024 | CGPA: 8.14

M-Tech Data Science

G H Raisoni College of Engineering and Technology, Amravati

2024 – 2026 | Pursuing
