Objective

Motivated AI Learning Specialist with hands-on experience in **Artificial Intelligence, Data Analytics, Machine Learning, UI Design, Agentic AI, and Software Development**. Skilled in developing machine learning models, designing intuitive user interfaces, and creating learner-centric digital content, including AI agents and intelligent learning solutions. Experienced in collaborating with cross-functional teams to deliver data-driven and user-focused products. Passionate about leveraging AI technologies to build innovative solutions and aspiring to grow as an **AI and learning-focused professional while contributing to impactful, real-world projects**.

Education

Sipna College of Engineering and Technology, Amravati
Bachelor of Engineering in Computer Science

June 2020 – May 2024

Skills

Programming & Data: Python, SQL, Excel, Power BI, HTML, CSS

Machine Learning & AI: Machine Learning, PyTorch, Agentic AI, Steamlit, Flask

UI / Design Tools: Figma, Canva

Instructional Design: Content creation, course structuring, learner-focused design

Soft Skills: Communication, Analytical Thinking, Problem-Solving, Adaptability, Teamwork, Creativity, Leadership

Experience

Leapot Technologies Pvt Ltd.

AI Learning Specialist

- Designed AI and data science learning content aligned with industry standards and learner needs.
- Created instructional materials, presentations, and visual assets using Canva.
- Designed wireframes, layouts, and UI components using Figma, following core UI/UX principles.
- Applied instructional design concepts such as structured learning flow, clarity, and learner engagement.
- Collaborated with technical and design teams to enhance learning experience and content quality.

Internship

Cojag Smart Technology Pvt. Ltd.

July 2023 – September 2023

- Developed and maintained a Python application integrated with a third-party API, improving data entry efficiency.
- Conducted unit tests to identify and fix bugs, ensuring application robustness.
- Worked with a cross-functional team to optimize code and reduce response times.

YHills E-learning

July 2023 – August 2023

- Analyzed and preprocessed a real-world dataset to develop a predictive system for fare amount estimation using temporal and geospatial features.
- Performed data cleaning, feature engineering, and exploratory data analysis (EDA) to improve data quality and model performance.

- Built, trained, and evaluated multiple machine learning regression models, including Linear Regression, Random Forest Regressor, and XGBoost, to compare predictive accuracy and robust

Projects

AI Study Planner

- Built an **AI-based study planner** that generates personalized study schedules based on subjects, available time, and deadlines.
- Developed a responsive interactive UI using **Streamlit** for easy user input and study plan visualization.
- Implemented Python logic for task prioritization and study time allocation.
- Added features for **progress tracking and productivity insights** to enhance learning efficiency.

Student Productivity Prediction

- Developed a machine learning-based system to predict **student academic performance** using historical educational data.
- Performed **data preprocessing, feature engineering, and exploratory data analysis (EDA)** using Python libraries such as **Pandas and NumPy**.
- Implemented prediction models using **machine learning algorithms** to analyze factors affecting student outcomes.
- Designed a **simple web-based user interface using HTML and CSS** to allow users to input student data and view prediction results.
- Visualized insights using **Matplotlib/Seaborn** and evaluated model performance using appropriate metrics.
- Demonstrated how data-driven insights can help identify at-risk students and support better educational decision-making.

Student Performance Indicator

- Built a **machine learning model** to **predict student academic performance** based on demographic and socio- economic attributes, including parental education and test preparation.
- Conducted EDA, feature engineering, and model evaluation to identify key factors affecting student outcomes.

Extra-Curricular Activities

- Active member of the Computer Science Club; participated in hackathons and coding competitions.
- Organized social events and volunteered through NGO initiatives.
